# ORIGINAL DESIGN MANUFACTURING

DDK Original Design Manufacturing process brings your vision to life.

With an eye on the current market demands, DDK creative team designs and develops your ideas using the most appropriate technologies, materials and current innovations.

## SUSTAINABILITY AND INNOVATION

Sustainability and innovation are key concepts in DDK's agenda for development and ecological transition.

DDK thinks green by introducing new policies for a sustainable growth, aiming to drastically reduce CO2 emissions and environment pollution. DDK first goal is reducing the energy dependence on non-renewable energy sources by relying on clean energy.

DDK's establishments are completely covered with solar panels, currently providing around 20% of the entire energy need.

But it's not all about energy saving and air pollution.

Recycling is the second major strategy for reducing environmental pollution and plastic consumption. In 2022, DDK reached the ambitious goal of using only recycled material for packaging; the goal is to use recycled materials also for the saddles covers, plastic shells and bumpers in the very next years to come.

PASSION  
FOR GREEN

# DDK TECHNOLOGY

**AIR SUSPENSION**  
Air ball inserts to dampen vibrations

**POINT FLEXIBLE**  
Pressure release point design

**FAST TRACK INSERT**  
Mount system for accessories

**STRESS RELEASE**  
Shell and rail optimized to reduce saddle stress

**SUPER LITE FOAM**  
Specific foam padding to reduce the saddle weight

# RIDING POSITION

*Choose the type of saddle you want according to your riding style.*

## ATHLETIC (30°)

As you rotate forward, your ischium contact point narrows.

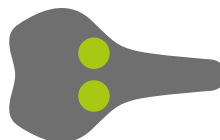

ISCHIUM POINT

## MODERATE (60°)

Go the distance in comfort.

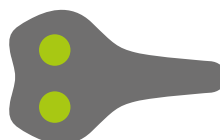

ISCHIUM POINT

## RELAXED (90°)

Use it every day, enjoy it every day.

ISCHIUM POINT

**BREATHABLE**

Shell cut to reduce pressure in the perineal area

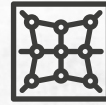

**MICRO D:TEX COVER**

Specific cover for anti-slip

**WATERPROOF**

Water repelling cover treatment

**ULTRA-TECH**

High quality cover for VMFIT

**SCRATCH-PROOF COVER**

Rugged covers to reduce scratches and UV damage

**SOFT PLUS**

Increased cushioning for more comfort

**SOFT TOUCH**

Soft touch cover for the softie in all of us

**HANDLE-GRIP**

Handle-grip

*We offer gender specific saddles.*

**BORN WOMAN**

Due to the wider pelvis, women's saddles require specific sit bones comfort areas, different from men's saddles. They also need special features to avoid unwanted pressure on the soft tissue.

**BORN MAN**

Having closer sit bones compared to women, men need a saddle with different sitting points. The pressure relief channel is of key importance to avoid unwanted pressure on soft the tissue.

APEIRO  
R8

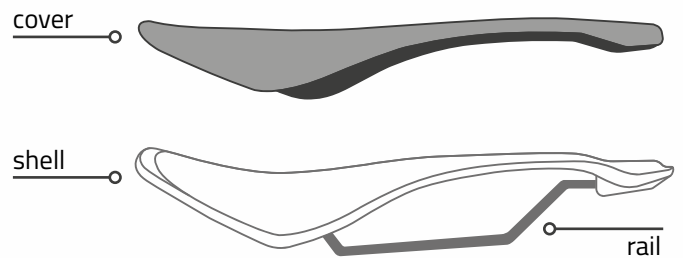

# APEIRO R8

## APEIRO

### TECHNOLOGY

Apeiro R8 saddle is designed for high-intensity performances and distant rides. The shape allows a more forward-rotated position to avoid pain and numbness even during aggressive rides.

ergo metric

ergometrix

# ERGOMETRIX

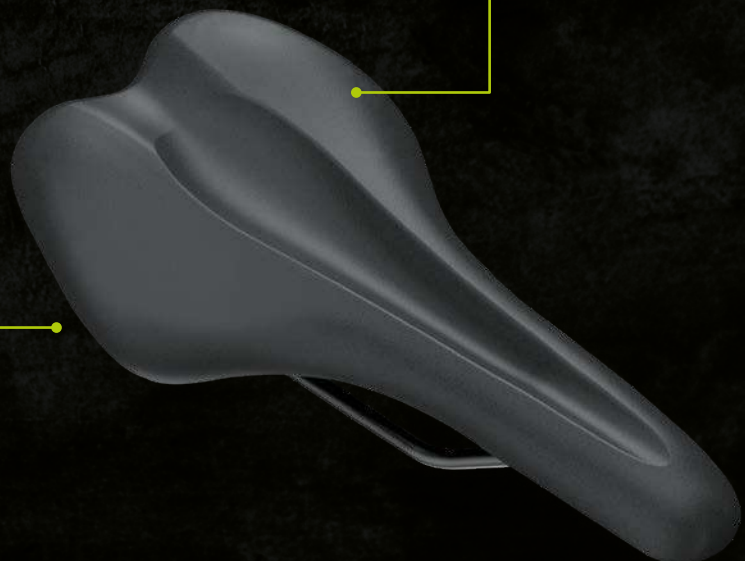

## TECHNOLOGY

Ergometrix saddles help to minimize the pressure on soft tissues, allowing to have more comfort and longer rides. The ergonomic lines of the center hole are designed to improve comfort and support the pelvic area. The bigger hole is the key element that reduces the pressure applied to the prostatic area.

The best performance is yet to come.
